English as the main language.

Aim
The Master's Programme in Film and Media aims to deepen the student's practical professional skills and prepare the student for conducting artistic research. Through the courses, the student shall strengthen his or her ability, in an experimental and critically reflective way, to both formulate and work in theory and in practice on artistic problems at an advanced level.

1,2 Applies to following specialisations: Documentary Processes (2), Directing Documentary (3), Directing Fiction (5), Cinematography (6), Film Editing (7), Film Sound Design (8), Scriptwriting for Film and Television (9), Producer for Film, Television and New Media (10), and Radio (12).

3 Applies to following specialisations: Animation (1), The Art of Impact (4) and Production Design (11).
Programme Structure

In the first three semesters, students are introduced to different perspectives on knowledge, theory, reflection and artistic research methods. These courses include knowledge production, method, documentation and exposition of artistic research.

Programme-specific elective courses give students the opportunity to immerse themselves in the context and significance of film and media in our societal development, explore their relationship with audiences and the outside world and challenge the possibilities for the exposition and distribution of mediated works.

The first year also includes methodology courses within the specialisation and collaborative lab courses in which the students apply their specialisation’s artistic practice in collaboration with students from other specialisations within the programme who in turn apply their own specialist practice.

University-specific elective courses give the students the opportunity to broaden their expression beyond film and media, view their artistic practice in relation to other art forms and transdisciplinary collaboration across the whole of SKH.

The final result of the programme must be a degree project in the form of one or more film and media projects created individually or in teams. Specialisations 1, 2, 4 and 12 can choose to perform degree projects in teams or individually. Specialisations 3, 5, 6, 7, 8, 9, 10, 11 perform degree projects in teams. The students must also make their own exposition where they reflect on their own artistic process, in the medium of their own choise. The exposition and its process documentation must be made available to a wider target group.

Specialisations
The following specialisations exist within the programme: Animation (1), Documentary processes (2), Directing documentary (3), The Art of Impact (4), Directing fiction (5), Cinematography (6), Film editing (7), Film sound design (8), Scriptwriting for film and television (9), Producer for film, television and new media (10), Production design (11) and Radio (12).

Progression requirements
All of the specialisation are not open for applications every year. Which specialisations are offered is decided before each round of admissions. Information on which specialisations are offered is published on the website before each admissions round.

A specialisation starts on the condition that there are sufficient qualified applicants.

Progression requirements
Rules for progression within the programme are given in the form of eligibility requirements within each course syllabus.
